GAMPANG ROZAKI

FULLSTACK WEB DEVELOPER

Yogyakarta, Indonesia

ABOUT ME

I am a Web Developer with over one year of experience in web development, specializing in building and maintaining web-based applications using Laravel and PHP. I have experience working on hotels management systems, covering various operational aspects such as employee management, customer management, hotel sales, and financial operations. My responsibilities also include developing new features, maintaining existing systems, and integrating third-party services to improve operational efficiency. I am passionate about continuous learning, solving technical challenges, and developing reliable, scalable, and user-friendly web applications.

TECHNICAL SKILLS

- Languages: PHP, JavaScript, Go, Solidity, WordPress
- Frameworks: Laravel, NextJs
- Databases: MySQL
- Tools: Git, REST API, Postman

PROFESSIONAL EXPERIENCE

Full Stack Web Developer **Nov 2025 - Present**

PT Royal Dparagon Land - Hotel Management System

- Developed and maintained an internal hotel management web system covering finance, technical, inventory, customer, and operations modules.
- Performed routine maintenance, including bug fixes, performance optimization, and system updates, to ensure stable daily operations.
- Collaborated with management and operations teams to translate business requirements into technical solutions.
- Managed the incoming payment flow for prepaid electricity token sales via the Digiflazz API, achieving a 90% transaction success rate.
- Built a laundry inventory module with stock opname (physical stock reconciliation) to keep stock records accurate and track supplies.

Full Stack Web Developer Intern **Jan 2025 - Jul 2025**

CV Karsa Prawira

- Developed a company portfolio website, covering landing page, user management, content management, and user dashboard.
- Implemented role-based access control and a content management feature for easier website updates.
- Designed a responsive, user-friendly dashboard for end users.

Full Stack Web Developer **Mar 2025 - Oct 2025**

Javas Technology Integrator

- Built 1BatangToru, a multi-stakeholder documentation and collaboration platform with multi-role access, event management, document uploads, discussion chat, dynamic CMS, and user dashboards.
- Developed a multi-merchant SaaS Point of Sale system serving multiple merchants on one platform.
- Delivered both projects end-to-end, from frontend and backend development to deployment.

Owner Gadesain **Des 2024 - Nov 2025**

- Built Gadesain, an online wedding invitation platform with shareable links, guest RSVP, and a greeting card feature for the couple.
- Developed additional invitation features including event details, gallery, location map, countdown.

Freelance Web Developer **Apr 2024 - Des 2025**

UNFCCC COP 2024 & COP 2025 Projects

- Refined and enhanced existing web projects for UNFCCC COP 2024 and COP 2025, improving functionality and user experience.

Icon Hub (Meeting Room Booking Platform)

- Built the frontend for a meeting room booking platform and its landing page.
- Developed booking interfaces for browsing rooms, checking availability, and submitting reservations.

EDUCATION

MA Pondok Pabelan **Jun 2018 - Jul 2021**

Studied Science, focusing on Mathematics, Physics, Chemistry, and Biology. Developed analytical thinking, problem-solving, and logical reasoning skills.

Associate Degree in Informatics Engineering Amikom University **Aug 2022 - Nov 2025**

Focused on software development, web programming, database management, and information systems

- Studied web development, programming, and database management.
- Gained knowledge of software engineering and information systems.
- Focused on developing practical solutions through technology.

OTHER PROJECT

Lending Pool Protocol (Smart Contract)

- Developed a decentralized lending pool protocol in Solidity, enabling users to deposit assets and borrow against collateral.
- Built a Go-based SDK with reusable smart contract templates, helping developers build and deploy contracts faster.
